

Orcan Energy AG

Die Zukunft aktiv gestalten – Energieeffizienz umsetzen

As world energy consumption sky-rockets, we are continually challenged to create sustainable and affordable new energy resources. At Orcan Energy AG, an affiliate of the Technical University of Munich, we have assumed the task of developing viable energy alternatives to meet tomorrow's needs. Our pioneering development generates energy simply by using a so far untapped and CO₂-neutral source with huge potential for the society: Waste Heat!

Application & Project Engineer (m/f/d)

Your future tasks:

- You take the lead in technical supervision of national and international customer projects in the sectors of industry, geothermal energy or at power stations.
- You are responsible for the generation and assessment of project simulations and technical conception and you work on efficient proposal solutions for the customer and/or the customer site.
- You work on the interface between the heat source of the customer and our efficiency PACKs. You choose and construe all installations and components, and submits offers for the customers.
- Finally, you are in charge of project realization, coordination of (installation) partners and of the implementation at the customer site.

Qualifications you will need for the job:

- You either have an academic technical degree (Mechanical Engineering or equivalent) or a sound vocational degree as a technician combined with good understanding of economics.
- You are highly motivated when it comes to energy saving and CO₂ reduction and you can therefore offer a minimum of 2 years' experience in the relevant fields.
- You have got extraordinary analytical skills and solution solving competence; you are flexible and resilient even in times of high pressure.
- You know how to use MS Office applications, simulation tools and are experienced with CAD systems.
- Sales affinity and frequent travels (especially in relation to our international projects) are an extra asset to this position.
- You use German language as a mother tongue and are fluent in English. Further languages skills are an advantage.

What to expect at Orcan:

- Start-up atmosphere, free choice of fruits, coffee and soft drinks and an open mindset.
- At Orcan you find your professional home. Don't miss your chance and become part of our successful team!
